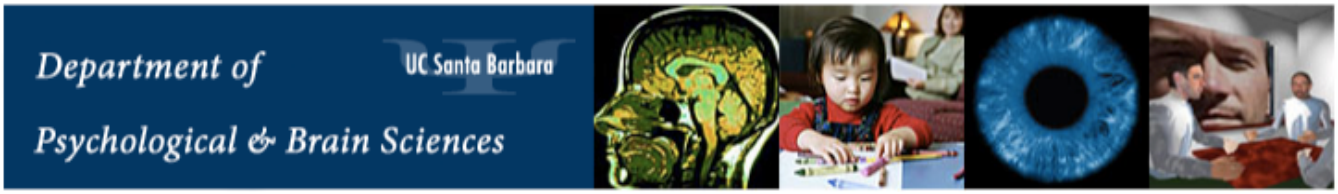
UCSB Protocol #: PSYC-MI-MI-045-17U



Research Participants Wanted

The Human Memory and Neuroimaging Lab in the Department of Psychological and Brain Sciences at UCSB is seeking research participants for a functional magnetic resonance imaging (fMRI) study that is investigating the relationship between various personality and cognitive factors and memory. The study will take place on two separate days and will last about two hours each day. Participants will respond to questionnaires, complete cognitive tests, and have their brain activity measured using fMRI. Participants will be compensated with $20/hour and will receive an image of their brain.

To be eligible, participants must:

- Be between the ages of 25 and 35
- Be native English-speakers
- Not be pregnant
- Not have any metal in their bodies that cannot be removed
- Not be claustrophobic
